

Job Title: Salesforce Technical Architect

Job Type: Full Time

Job Location: Atlanta/Remote

Travel Expected: Yes (No travel expected during Covid-19)

Job Id: NY1002

Introduction:

Navyaan is an IT consulting corporation which is focused on providing solutions, services, support to different organizations from sectors which include, but not limited to, healthcare, public, automotive, IT, retail, consumer goods, finance, communication, media, entertainment and others using latest Cloud technologies, primarily Salesforce. It also focuses on building innovative products that help in automating and improving digital platforms for various industries.

Currently NavYaan has its offices in Atlanta (GA), US and Hyderabad (India).

As a Technical Architect, you will lead NavYaan into the future by shaping and innovating Salesforce and digital solutions for large scale transformation projects. The success of NavYaan is in your hands as you transform vital business needs into solutions and drive innovation. You will be learning, managing, building, mentoring and leading teams as we grow.

Required Technical and Professional Expertise

- Bachelor's Degree in Computer Science or related field
- Consulting experience with medium to large consulting firms focusing on cloud computing related consulting (storage, SaaS, multi-tenant computing, large scale computing environments, etc).
- Strong background in Cloud Computing solutions – cloud computing strategy, systems design, implementation and management.
- Familiarity with multiple implementation standards and methodologies.
- Programming Languages – APEX, VisualForce, Familiarity with ANT and Eclipse tools for working with the IDE.

- 4-6 years of prior experience in a consultative role with 5 years of prior experience in a consultative role building Salesforce-based solution
- Must be able to lead clients to gather business requirements and translate to solution
- Must have deep and wide knowledge experience and expertise on the Salesforce platform
- Good knowledge in integration-based project in enterprise context (examples: SOAP, REST API, data strategy, 3rd party integration)
- Deep understanding of Java, HTML, Javascript (including Javascript libraries such as jQuery and Prototype) and CSS
- Exceptional knowledge of object-oriented concepts and development experience with design patterns including MVC and MVC framework
- Experience with relational databases, including work with SOQL, MySQL, SQL Server, Oracle, or other common RDBMS
- Experience with managing, coaching development teams
- Knowledge of Agile development practices
- Must be able to produce detailed documentation
- Ability to travel up to 60%
- Proven ability to build, manage and foster a team-oriented environment.
- Proven ability to work creatively and analytically in a problem-solving environment
- Excellent communication (written and oral) and interpersonal skills.
- Excellent leadership and management skills.

Preferred Certifications

- Administrator
- Platform App Builder
- Platform Developer 1
- Data Architecture and Management Designer
- Sharing and Visibility Designer
- Application Architect
- Integration Architecture Designer

- Sales Cloud Consultant OR Service Cloud Consultant
- Platform Developer II (Optional)
- Other Domain Specialization certifications (Optional)

Your Role and Responsibilities

- Create and envision solutions that transform the way our clients conduct business
- Scope and estimate Salesforce and digital user-centric solution
- Provides advanced technical and/or business consultative services during both the pre-sales and delivery cycles
- Effectively collaborates with business consultants, project team and client resources to determine technical and functional requirements
- Designs and develops customer solutions in Lightning, VisualForce, Apex, D/HTML, CSS, JavaScript, AJAX and other technologies
- Effectively facilitates Technical Process Review sessions and technical UAT's
- Oversee the process and architecture redesign to align to common platform best practices with shared data and features
- Align application functionality to Salesforce native and configurable architecture and features.
- Gathers data migration requirements, analyzes data quality requirements, defines a data quality migration plan and executes the plan

Qualified applicants will receive consideration for employment without regard to their race, ethnicity, ancestry, color, sex, religion, creed, age, national origin, citizenship status, disability, medical condition, military and veteran status, marital status, sexual orientation or perceived sexual orientation, gender, gender identity, and gender expression, familial status, political affiliation, genetic information, or any other legally protected status or characteristics.

All NavYaan offers of employment in the U.S. are contingent upon the ability to successfully complete the onboarding process and provide the essential onboarding documents.
